

Project Title
Conducting Members

Executive Summary:

1. Introduction

1.1 Problem Statement (analyzed by existing solution)

1.2 Objective

2. Methodology

2.1 Data Collection Procedure

2.2. Data Validation Procedure

2.3 Data Prepossessing Technique

2.4 Feature Extraction Technique

2.5 Normalization

2.6 Classification Algorithms

2.7 Block Diagram of Proposed Model

2.8 Data Analysis Techniques

2.9 Experimental Setup

3. Results and Discussion

3.1 Results Analysis by comparison existing solution

3.2 Results validation by Graphical Representation

4. Conclusion and Future Recommendations

4.1 Significant of outcomes

4.2 Recommendation for Future Work

Appendixes:

All codes module by module and its purpose
